Wolverhampton	wolv	Being planned
Yeadon (Leeds North)	yead	Sep-11
York	york	Jun-11

Not sure how to tell which location you're connected to?

If you're an existing customer, you can find out your location on our network by following these steps when online at home:

1. Go to <http://tools.virginmedia.com>
2. Under "Your Access Info", note down the details of your Client Host Name
3. The Client Host Name contains the 4 digit location short name listed in the rollout schedule – and you can use this to find out the estimated rollout to your location. e.g xxxx.hari.cable.virginmedia.com = **Haringey**

If you don't already have Virgin Broadband, check your post code at www.virginmedia.com/broadband to find out what services are currently available in your area – if you are in a cable area, you can enjoy up to 50Mb straight away!
