

## Virgin Broadband -upload speed improvement schedule

The schedule below will give you an idea of when the new upload speeds will be coming your way. Increasing upload speeds is a complex activity that has to be rolled out carefully across the Virgin Media network, so timings may change.

Keep an eye on this schedule for the latest dates!

Last updated: 21/12/11

## Need a hand finding which network location you're connected to?

If you're an existing customer, you can find out your location on our network by following these steps when online at home:

1. Go to <http://tools.virginmedia.com>
2. Under "Your Access Info", note down the details of your Client Host Name

3. The Client Host Name contains the 4 digit location short name listed in the rollout schedule – and you can use this to find out the estimated rollout to your location. e.g. xxxx.hari.cable.virginmedia.com = **Haringey**
- 4.

If you don't already have Virgin Broadband, check your post code at [www.virginmedia.com/broadband](http://www.virginmedia.com/broadband) to find out what services are currently available in your area.
